Segundo—Building Complete Solutions

Segundo

Segundo is an established provider of software, project management, and training services for the reengineering, implementation, and maintenance of Enterprise Resource Planning (ERP) applications and e-business solutions. We align your business strategies and goals with a methodology that respects your needs and adapts to the technological changes of the future. Our seasoned professionals develop software that is widely needed in both public and private industry. We tailor our technology services to best address the needs of each client, turning a loosely defined problem or a precise requirement into complete systems solution.

Services

At Segundo, we use an integrated, multidisciplinary team approach to develop comprehensive solutions in a timely and cost-effective manner.

e-Business Solutions

We provide software, professional services, and partnerships to help clients leverage the Web for more profitable and effective business operations. We incorporate leading-edge technology to:

- ▶ Reduce backlog
- ▶ Develop e-Commerce strategies
- ▶ Facilitate Oracle® application integration
- ▶ Implement data warehousing solutions
- ▶ Integrate Web servers, databases, and development tools

Hardware and Software

We turn hardware and software into workable solutions for clients. Our consultants use proven methodologies and programming techniques to develop:

- ▶ Customized software
- ▶ System configuration planning
- ▶ Enterprise Resource Planning

Project Planning and Relationship Management

We work closely with clients to develop business practices, using software technology, to help companies plan and respond to their own clients' needs in an effective and profitable manner.

Oracle® Applications Consulting

Oracle® is one of the most widely used ERP applications in the business world today. We combine our services into a comprehensive package and process—from planning to training and follow-up support.

Our specialization extends to implementing Customer Relationship Management (CRM) applications. CRM solutions help businesses automate and improve processes thereby increasing focus on customers and prospects. Most important is CRM's use in promoting and enabling e-Business, allowing businesses to track their customers, suppliers, and partners.

Training and Education

We conduct corporate technology training courses at client sites or our own training facility. We offer instructor-led training courses using courseware development and documentation.
